

tesseract/tesseract  
\_planning/tesseract  
\_process\_managers/include  
/tesseract\_process\_managers  
/core/default\_process\_planners.h

```
graph BT; A["tesseract/tesseract_planning/tesseract_process_managers/src/core/default_process_planners.cpp"] --> C["tesseract/tesseract_planning/tesseract_process_managers/include/tesseract_process_managers/core/default_process_planners.h"]; B["tesseract/tesseract_planning/tesseract_process_managers/src/core/process_planning_server.cpp"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a header file box (shaded gray) containing the path: tesseract/tesseract\_planning/tesseract\_process\_managers/include/tesseract\_process\_managers/core/default\_process\_planners.h. Below it are two source file boxes. The left box contains the path: tesseract/tesseract\_planning/tesseract\_process\_managers/src/core/default\_process\_planners.cpp. The right box contains the path: tesseract/tesseract\_planning/tesseract\_process\_managers/src/core/process\_planning\_server.cpp. Two blue arrows point from the source files up to the header file, indicating that both source files include this header.
